

June 29, 2017

The Honorable Pat Roberts
Chairman
Committee on Agriculture, Nutrition
and Forestry
United States Senate
Washington, DC 20510

The Honorable Debbie Stabenow
Ranking Member
Committee on Agriculture, Nutrition
and Forestry
United States Senate
Washington, DC 20510

Dear Chairman Roberts and Ranking Member Stabenow:

The undersigned organizations are writing to support the proposed amendment to HR 1029, the Pesticide Registration Enhancement Act. The support for this legislation comes from a unique coalition of organizations—environmental NGOs, farmworker advocates, state regulatory agencies, pesticide companies and industry trade associations. We stand together in support of Chairman Roberts's mark-up of PRIA IV. We encourage all Senators to support the language during today's committee mark-up and during subsequent action on the Senate Floor.

This coalition first came together to support initial passage of the Pesticide Registration Improvement Act of 2003 (PRIA). The Pesticide Registration Enhancement Act is now in its third reauthorization.

The key goals of PRIA have been to provide an industry-funded source of adequate funding to support key functions of EPA's Office of Pesticide Programs in registering new pesticides and new pesticide products, and, reviewing existing pesticide products. Prior to PRIA, the review process for new pesticides could take several years or longer and jeopardized innovation. PRIA established a new section of FIFRA, which put in place a fee schedule for pesticide registration requests. PRIA also lists specific time periods for EPA to make a regulatory decision on pesticide actions.

Also, prior to PRIA, EPA had a goal, but not a mandate, to review existing pesticides on the market. Under PRIA, EPA is required to review a pesticide at least every 15 years to determine whether the pesticide should continue to be distributed in the U.S., or whether additional measures are needed for a pesticide to meet the legal standard for use under FIFRA.

The Senate amendment to H.R. 1029 builds upon the win-win tradition of PRIA. The maintenance fees in the amendment to H.R. 1029 provide funds to EPA to accomplish the registration review required by the law in a timely fashion. It also tracks that the risk mitigation measures are implemented by the agency. It increases and clarifies categories of EPA actions covered under the law and protects funds for research and grant programs for worker safety and training. It provides assurance that registration actions will be reviewed in a timely manner.

This legislation will continue the positive progress that the original PRIA brought to the pesticide registration and evaluation process. We respectfully urge Congress to move quickly to reauthorize this highly successful program, providing certainty to the regulated community in the review of pesticide applications, and continued scrutiny over the appropriate use of pesticides to provide assurance to the public.

Sincerely,
